

YMH-Series

This is a horizontal continuous motion cartoning machine adopted rotary carton extraction structure. A series of process, carton opening, packing and sealing, is implemented by continuous operation. The under open frame structure improves cleanliness and maintainability.

YMH-102B

Continuous motion cartoning machine corresponding to new generation

**Multifunctionality**

It will help design production system with high certainty by setting IJP and various inspection systems and responding flexibly to various options.

High Functionality

With an adoption of servo motor in main drive, more certain motion is made possible by optimal control.

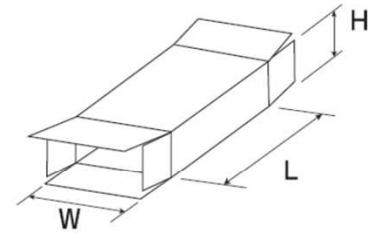

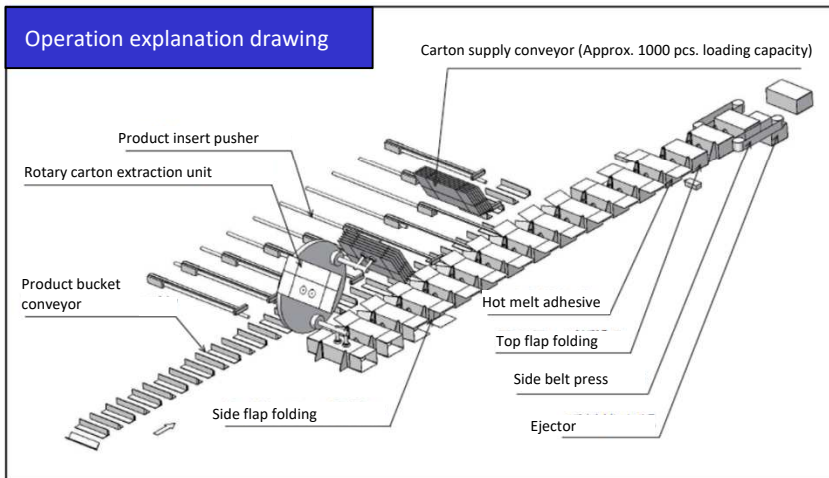

Easy size change

Steering wheel adjustment is equipped in the main part to make size change easier and to enhance reproducibility.

※Self-feeding system to bucket conveyor is available as option.
