

YMH-Series

This is a horizontal intermittent motion cartoning machine. A series of process, carton extraction, packing and sealing, is performed in a positive movement. The transparent cover makes it possible to improve visibility and maintainability.

YMH-201 M

Horizontal intermittent motion cartoner corresponding to new generation

Multifunctionality

It will help design production system with high certainty by setting IJP and various inspection systems and responding flexibly to various options.

High Functionality

With an adoption of servo motor in main drive, more certain motion is made possible by optimal control.

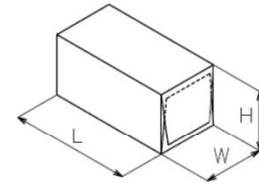

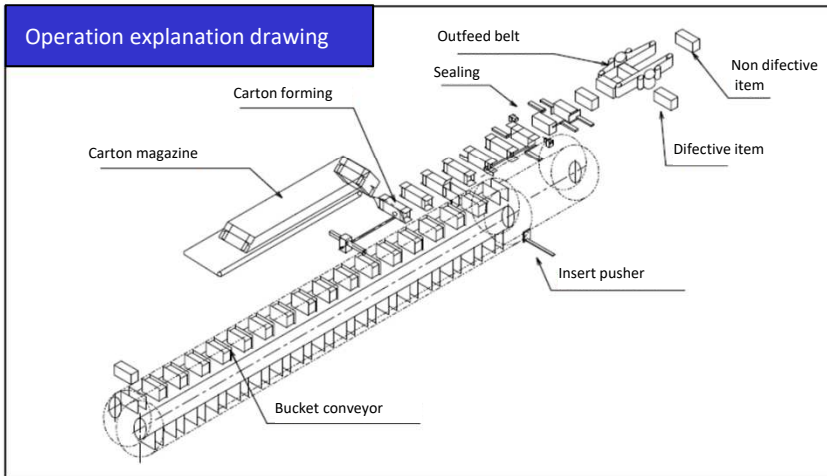

Easy size change

Steering wheel adjustment with indicator is equipped in the main part to make size change easier and to enhance reproducibility.

※Self-feeding system to bucket conveyor is available as option.
